

Fiber Lab 750

Network Link & Delay Simulator

Simulate up to 160km

Customized to specification

Compact 3RU chassis

Many fiber configurations

The **Fiber Lab 750** offers the most efficient solution for engineers that require a larger quantity of medium to longer length spools in a more compact format for network simulation and time delay applications. Fully-customized, this 19" x 3RU chassis allows for a wide array of configurations ranging from as many as 12 to 24 shorter distance spools to a full-duplex 80km (160km total) link.

[Design a Fiber Lab 750](#)

To get started, simply share some of your preferred requirements with the M2 team:

- Fiber Type(s): any single mode, multimode, specialty, or ribbon fibers from leading manufacturers
- Fiber Lengths/Delays: any custom lengths by distance or delay value
- Connector Type: LC, SC, FC, ST, MPO

When you are ready to take the next step, a member of the M2 team or an authorized partner will personally help to determine the most efficient setup for your needs.
