

# Fiber Lab Tri-Flex

## Network Link & Delay Simulator

Efficient, portable setup

Customized to specification

Up to 3 Flex Spool Modules

Combine or re-configure lengths

The portable **Fiber Lab Tri-Flex** offers up to three (3) individual lengths of fiber in a highly efficient format for lab and training environments. Measuring just 6 in (W) x 10.5 in (H) x 11 in (D), modules can be used in the chassis or removed as needed. Flex modules are available in three different sizes, depending on the required lengths: Standard Module up to 25km, Double Module up to 60km, or a Triple Module up to 80km.

In addition to adding or re-configuring lengths when needed, the modules also fit the Flex rack-mount chassis providing for a complete rack-portable hybrid setup approach.

### [Design a Fiber Lab Tri-Flex](#)

To get started, simply share some of your preferred requirements with the M2 team:

- Fiber Type(s): any single mode, multimode, specialty, or ribbon fibers
- Fiber Lengths/Delays: any custom lengths by distance or delay value; per module size
- Connector Type: LC, SC, FC, ST, MPO

When you are ready to take the next step, a member of the M2 team or an authorized partner will personally help to determine the most efficient setup for your needs.
