

# Sidekick Plus

## OTDR Training & Demo Solution

Includes in-line fiber events  
Customized to specification

All fiber types  
Compact, rugged module

The **Sidekick Plus** for OTDR training applications provides a portable, protected spool of fiber with built-in events that helps train technicians learning to use an OTDR. Measuring only 8.25"x7"x1.5" in size, this compact module offers up to 5km and can include multiple events a technician can expect to see like splices, reflective connectors, and fiber mismatches ("gainers") .

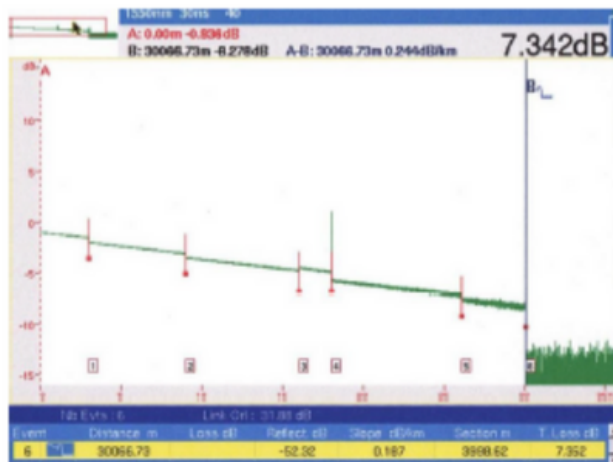

In addition to training scenarios, the SKP also serves as an excellent demonstration tool for OTDR manufacturers and sales teams that want to showcase the capabilities of their device.

### Design a Sidekick Plus

Contact M2 Optics with your preferred fiber type, fiber length, connector type, and event configuration.

#### OTDR Trace, multiple events:

1. Splice
2. Splice
3. "Gainer" / fiber mismatch
4. Connector
5. Splice
