

Fiber Lab MPO

Network Link & Delay Simulator

Portable or Rack-Mount
Customized to specification

Ribbon / Multi-fiber cable
MPO connectors

Available in any portable or rack-mount Fiber Lab solution, M2 Optics offers spooled ribbon and/or multi-fiber cabling for efficient link simulation or time delay applications. Whether you are simulating a delay between racks in a data center environment or need to certify the optical performance of a 400G SR8 optical transceiver, Fiber Lab platforms provide the perfect solution approach along with consistent results and easy connectivity.

[Design a Fiber Lab MPO](#)

To get started, simply share some of your preferred requirements with the M2 team:

- Fiber Type(s): single mode or multimode ribbon/cable
- Fiber Lengths: customized; dependent on enclosure style - inquire for details
- Connector Type: MPO or MTP®

When you are ready to take the next step, a member of the M2 team or an authorized partner will personally help to determine the most efficient setup for your needs.
