

Sidekick Plus

OTDR Training & Demo Solution

Includes in-line fiber events
Customized to specification

All fiber types
Compact, rugged module

The **Sidekick Plus** for OTDR training applications provides a portable, protected spool of fiber with built-in events that helps train technicians learning to use an OTDR. Measuring only 8.25"x7"x1.5" in size, this compact module offers up to 5km and can include multiple events a technician can expect to see like splices, reflective connectors, and fiber mismatches ("gainers") .

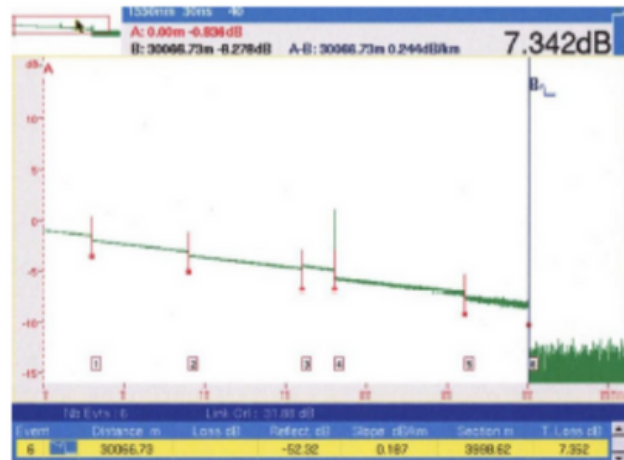

In addition to training scenarios, the SKP also serves as an excellent demonstration tool for OTDR manufacturers and sales teams that want to showcase the capabilities of their device.
